

Glazing instructions for “Performance Light Steel”

A732, a733, a734, a735, a736, a737, a738, a742, a743

Chassis only a750

Glazing procedure:

- Use exactly the same instructions as Minimal Art and the Titan next generation frames.
- Use the same 1.4mm Drill bit
- Use the same Drilling guide
- Mark, measure and drill the same as all SPX sleeve rimless mounting systems.

Exception:

- Use the **Hard BLS 58**
- The stainless steel material is less flexible and to retain the durability the Hard BLS 58 **must** be used.
